

Brain On Pixels

Playing with new digital camera
after reading manual evidently
hatched on 70's era copier.

Had batteries in backwards, but part
of learning curve, methinks. Voila!

Flashing some Eurotrash apartment
as kind of instructional slide to ac-
quaint one with those bitty icons

surrounding the frame. Bikes, then
zooming to subwoofer in rat's nest

of wires. Macro dust like marbles!
Oops, pad's mine own. First,
the broom!
